Comment Text :

1 [--->The Draft Environmental Impact Statement (DEIS) fails to meet the requirements of the National Environmental Policy Act (NEPA) because the DEIS does not provide a "full and fair discussion" of the project's impact on community emergency preparedness along the transportation corridors. A "fair" impact statement must include a discussion of the costs and time that it's going to take to adequately prepare every potential emergency response unit along the corridors for a nuclear accident.
